

New Garage

Beginning Monday, October 2, the garage at Highland Park will be opened under the name of the Highland Park Garage, doing a storage and general repair business. The garage will be conducted under competent management and only responsible mechanics will be employed.

A complete line of accessories and supplies will be in stock a little later, and oils and gasoline will be for sale at all times. Cars will be stored at \$5 per month or \$10 for live storage, which will include calling for and delivering cars if desired.

We will give you service and satisfaction.

ANDREW CARNEGIE HALE AND HEARTY AS HE APPROACHES EIGHTY-FIRST BIRTHDAY

Mr. and Mrs. Andrew Carnegie, photographed last week on the grounds of their palatial home in New York city.

On November 25 next Andrew Carnegie, the millionaire steel magnate, will celebrate his eighty-first birthday. As is his yearly custom, Mr. Carnegie saw the newspaper boys the other day and issued his annual birthday advice to the country. He declared himself to be in fine physical trim, and said that he was still getting a good deal of joy out of life.

PREPARES FOR BOOM.

BELFAST, Ireland, Sept. 29.—Belfast is preparing for a boom in shipbuilding after the war. Harland and Wolff have just leased from the harbor board forty-one acres of additional

land at a cost of 2,500 pounds a year. Workmen and Clerks are also increasing their shipbuilding ships. The congestion of building on the Clyde has also led to applications to the harbor board for accommodation in Belfast.

WILL BIG ED PFEFFER, DODGERS' STAR, BE ANOTHER WORLD'S SERIES SLAB HERO?

Ed ("Jeff") Pfeffer.

Ed Pfeffer, the Brooklyn Dodgers' best pitching bet, has more class physically than any other pitcher in the league and a big part of his speed this season may be attributed to his great physique. Pfeffer is not the brainiest pitcher in the game, but he knows thoroughly how to use all of his mechanical ability. He has lots of stuff and the strength to use it often.

KING ALBERT AGING FAST WITH CARES

Hair is Beginning to Turn Gray under the Cares and Sorrows of the Times.

FLUSHING, Netherlands, Sept. 29.—King Albert, of Belgium, has aged under the heavy cares and sorrows of the present time, and his hair is beginning to turn gray, according to the latest news from the Belgian front. His majesty never leaves the small strip of territory over which the Belgian flag still flies, refraining from visits to places in France or to Ste. Adresse, where his government has its seat. If the king of England or President Poincaré want to meet the Belgian sovereign, they have to go to this corner by the Yser.

The soldiers deeply appreciate the fact that their sovereign and commander-in-chief shares with them the monotony of his marshy bit of country, waiting, like them, for the day when Belgium shall be free once more. His majesty is frequently seen by his men—in the trenches, in barracks, on the sands and in the dunes. It is said, indeed, that no one knows better than he the twenty-five or thirty miles of trenches where the Belgian troops

keep vigilant guard day and night. He is particularly fond of visiting the advancing posts and his troops always feel some amount of anxiety when they desert the king's tall figure traversing the footbridges only some hundreds of meters distant from the enemy.

Queen Elizabeth, on the other hand, has with her own hands bound up many badly-wounded men in the Ocean hospital. Here she is in daily attendance, speaking an encouraging word here and there to the patients and distributing tobacco and cigarettes. Instances are related in which she has stood by the dying bed of simple soldiers. Her majesty is held in great veneration by the entire army.

TO ENFORCE QUARANTINE.

MEXICO CITY, Sept. 29.—Orders have been sent to the ports of entry of Mexico to enforce strictly the quarantine regulation against the spread of infantile paralysis. The regulation prohibits the entry into Mexico of children between five and fifteen years of age from sections of the United States where the disease is prevalent.

CONTRACT

AMSTERDAM, Netherlands, Sept. 29.—The Luxemburg iron manufacturers have prolonged their contract with the association of German Smelting furnaces to the year 1920, according to the correspondent of the "Tid." Up to the year, 1910 the iron manufacturers in the Grand Duchy were allied to the smelting furnaces in Lorraine, but in 1911 a part of them joined the big German association and the rest shortly afterwards followed this example.

8-FOOT BALLOT FOR NEW YORK MILITIA

Secretary of State Hugo and the eight-foot ballot.

New York state soldiers on the Mexican border will use an eight-foot ballot on election day, according to Secretary of State Hugo, the longest ever used in a combined national and state election. Neither the names of parties nor candidates will appear on it, so the name of every candidate to be voted for must be written in.

NICE FAT SNAKE HANGS FROM OFFICE TRANSOM.

CHICAGO, Sept. 29.—Here is the snake story again. When George D. Milligan, of the firm of Heath and Milligan, paint manufacturers at 616 South Wabash street, stated to enter his office the other morning he didn't.

The reason he describes as being fourteen feet and a half long and three inches through the middle. Mr. Milligan called some employees and the reptile was captured and confined in a box. Cy de Vry will examine the snake, which probably escaped from one of the South State street shows.

SKIRTS WILL BE LONGER AND MUCH LESS FLARING.

NEW YORK, Sept. 29.—Longer and less flaring skirts are indicated by the fall fashions, says the semi-annual report of the Silk Association of America. They will be of ankle length,

frequently made with more material than last season is the prediction. Paris fashions, it is asserted, have not favored the extremely short, almost freaky, skirts which have been worn here this year.

The wearing of these skirts unquestionably has increased the demand for silk hosiery, both fancy and plain, say the reports of the experts.

STUDY DISEASE IN METALS.

BERLIN, Sept. 29.—So firmly do some scientists maintain the theory that changes in metals are due to conditions resembling diseases in organic matter that a German navy yard maintains an expert to study the question.
